

NOAA Transition Plan Process

The Transition Plan is intended to provide the vision for the proposed capability and guide transition efforts toward operations. It is a living document to be amended with increasing detail as the project matures and will remain valid as long as the corresponding development project is completed successfully, satisfies end user-defined Line Office metrics for success and operational constraints, and clearly surpasses each of the associated gates for transition. The ultimate decision to transition this project to operations resides with the appropriate decision makers at the receiving Line Office. ***Signing this plan provides situational awareness of the work and approval to move forward, and does not represent a binding agreement.***

*AA or AA delegate approval
